Preface

The Civil Registration System (CRS) may be defined as a unified process of continuous, permanent and compulsory recording of the vital events and characteristics thereof, as legal requirements. In Chhattisgarh, the Civil Registration System covers registration of births and deaths only. It provides the best source information on the vital rates district levels.

This issues of '**Annual Report on the working of the Registration of Births and Deaths act, 1969 for the year 2017**' based on Civil Registration system Chhattisgarh provides an overview of the functioning of the Civil Registration System (CRS) in the State and presents compilation of data on registered births, deaths and infant deaths with rural - urban & sex-wise break-up and sex ratio at birth based on Civil Registration Records. An attempt has been made to present more detailed analysis and compared to previous reports.

The publication is divided into two parts. Part I provide brief review of the Civil Registration System and contains a summary analysis of data on registered births, deaths, infant deaths and sex ratio at birth at State level. Part II incorporates the main tables which provide District wise data on registered births, deaths and infant deaths with rural-urban & sex-wise break-up and sex ration at birth.

The data sources for the report are the form No - 1, 2, 3 and summary report - 11, 12, 13 provided by the Registrars of Births & Deaths. I take this opportunity to express my sincere gratitude to all Registrars and sub registrars of Births & Deaths for their kind cooperation in providing the required information.

The report has been prepared in the Vital Statistics section of this office. It is hoped that the results given in this report will be useful to all the stakeholders.

Suggestions for further improvement of the report will be highly appreciated.

Definitions used in this Report-

Birth: Live birth or still birth.

Live birth:

Complete expulsion or extraction from its mother of a product of conception, irrespective of the duration of pregnancy, which, after such expulsion or extraction, breathes or shows any other evidence of life, and each product of such birth is considered live-born.

$$\text{Crude Birth Rate (CBR)} = \frac{\text{Number of live births during the year}}{\text{Mid – year population}} * 1000$$

Still Birth:

Fetal death where a product of conception has attained at least the prescribed period of gestation.

$$\text{Still Birth Rate} = \frac{\text{Number of still births during the year}}{\text{Number of live births \& still births during the year}} * 1000$$

Death:

Permanent disappearance of all evidence of the life at any time after live birth has taken place.

$$\text{Crude Death Rate (CDR)} = \frac{\text{Number of deaths during the year}}{\text{Mid – year population}} * 1000$$

Infant Death:

Death of a child less than one year old.

$$\text{Infant Mortality Rate (IMR)} = \frac{\text{Number of infant death during the year}}{\text{Number of live births during the year}} * 1000$$

Maternal Mortality Ratio (MMR):

It is the number of maternal deaths per 1000 live births and still births.

$$\text{Maternal Mortality Ratio (MMR)} = \frac{\text{Number of maternal deaths during the year}}{\text{Number of live \& still births during the year}} * 100000$$

Level of Registration:

The level of registration, defined as the percentage of registered births/deaths to the births/deaths estimated through SRS, determines the performance level of a State / Union territory with regard to functioning of Civil Registration System.

$$\text{Level of registration (LOR) \%} = \frac{\text{Number of events during the year}}{\text{Number of estimated events for the year}} * 100$$

Mid-year Population: Population at the mid-point of the year, i.e., 30th June/1st July of the year.

$$\text{Number of estimated events for a year} = \text{Mid-year population} * \text{SRS Rate}$$

Sex Ratio: It is the ratio of females to males in a population measured per thousand males.

$$\text{Sex Ratio} = \frac{\text{Number of females}}{\text{Number of males}} * 1000$$

$$\text{Sex Ratio at birth} = \frac{\text{Number of female birth}}{\text{Number of male birth}} * 1000$$

$$\text{Sex Ratio at death} = \frac{\text{Number of female death}}{\text{Number of male death}} * 1000$$

1. CIVIL REGISTRATION SYSTEM (CRS) IN CHHATTISGARH

Introduction:-

The Civil registration is the way by which countries keep a continuous and complete record of births, and deaths records of their people, as provided through the legal requirements of the State. It is compulsory to report births and deaths to the registrar of birth and deaths under the Registration of births and deaths Act, 1969. Registration of births and deaths is in the interest of the individual and the nation and an important source for demographic data for socio-economic development and population control in developing countries. In India, the need for dependable demographic data was felt soon after independence heralding the era of Five Year Planning.

In India the registration of vital events and the administrative machinery for this purpose has been in existence for more than a century. It had been working under diversified Acts and executive instructions thus making it unsuitable for the independent India.

In the beginning, the registration of births and deaths started on voluntary basis and there was no uniformity in statistical returns resulting in both under registration and incomplete coverage. In order to unify the civil registration activities, the Civil Registration System (CRS) was introduced in India under the registration of Births and Deaths Act (RBD Act), 1969. Civil Registration System may be defined as a continuous recording of vital events such as births, deaths and marriages occurring in a population. The basic uses of data from Civil Registration System are

- Maintenance of permanent records on births and deaths as legal documents.
- Assessment of continuous changes in population.
- Evaluation of success of Socio-economic programs by indicators based on vital events and size of population.

As a matter of fact, requirement of this system as legal proof of births and deaths should in itself be strong enough reason for any country to have fully operational CRS.

Registration of Births and Deaths Act 1969

In India, the registration of births and deaths is carried out under provisions of the Registration of Births and Deaths (RBD) Act, 1969. Provision for registration of births and deaths and the mechanism thereof had been in existence in India for more than a century, however, the work of registration was carried out under various laws and byelaws existing at that time in different parts of the country. The need for improvement in the vital statistics system was felt for long time and, therefore, on recommendations of various committees and conferences, the Registration of Births & Deaths Act, 1969 providing for compulsory registration of births and deaths was enacted. Since then, this Act has been enforced uniformly across all the States and Union territories. This Act provides for registration of births and deaths and publication of statistical reports annually based on the civil registration data. The enactment of the Registration of Births & Deaths Act, 1969 has provided a common framework for putting in place a sound system of registration of births and deaths in the country

National Level:-

At national level the Registrar General of India (RGI) administers CRS. He is empowered to issue general directions and take steps to co-ordinate and unify the activities of Chief Registrars of the States, who are the Chief Executive authority in the states for executing the provision of RBD Act 1969, and the rules and orders made there under. They were responsible for coordinating, unifying and supervising the work of CRS within their respective state.

State Level:-

Birth and Death Registration in Chhattisgarh has come into force through The “Chhattisgarh birth and death Registration Rule 2001”. The primary Registration unit in Rural Area is gram panchayat. There are around 10980 gram panchayat covering more than 19000 villages in the 27 districts of Chhattisgarh. Gram panchayat secretary is the registrar in the gram panchayat. These gram panchayat register the births & deaths occurred within their jurisdiction. In the urban areas chief municipal officers (CMO) are designated as registrar of births & deaths and In the institutions, the Officers in-charge of District Hospital/Community Health Centers/Primary Health Centers/Central-State Public Sector Hospitals are functioning as the Registrars of births and deaths and the Officers in-charge of Sub Health Centers (ANM) are functioning as the Sub-Registrars of births and deaths.

Organizational setup in the State:-

I. Chief Registrar

The commissioner cum Director of Directorate of Economics & Statistics, Government of Chhattisgarh is the Chief Registrar of Births & Deaths.

II. Divisional Chief Registrar

The Divisional commissioner, Government of Chhattisgarh is the Divisional Chief Registrar of Births & Deaths for the Revenue Division.

III. Additional Chief Registrar

The District Collector is the Additional Chief Registrar of Births & Deaths for the Revenue District.

IV. Assistant Additional Chief Registrar

The Chief Executive officer of Jila (District) Panchayats is the Assistant Additional Chief Registrar of Births & Deaths.

V. District Registrars

The District Planning and Statistical officers of 27 districts in the state are functioning as the District Registrars.

VI. Additional District Registrars

The Chief Executive Officers of the Janpad Panchayats are the Additional District Registrars of Births & Deaths in their Janpad Panchayat.

VII. Registrars

Commissioner, Municipal Corporation and the Chief Municipal Officers (Municipal Council/Nagar Panchayat) are the Registrars of Urban Areas.

The Secretaries of Gram Panchayats are the Registrars in their Gram Panchayats. The Officers in-charge of District Hospital/Community Health Centers/Primary Health Centers/Central-State Public Sector Hospitals is functioning as the Registrars of births and deaths in their Institution.

VIII. Sub-Registrars

The Officers in-charge of Sub Health Centers (ANM) is functioning as the Sub-Registrars of births and deaths.

The Process -

The data reporting forms contain details of birth, death and still birth. Birth registration form contains information on date of occurrence/registration, usual residence of mother, place of birth, sex and weight of the child, order of birth, type of medical attention at birth, type of delivery and characteristics of the parents including their name, sex, age, marital status, religion, occupation. Death registration form contains information on usual residence of the deceased, place of occurrence, date of occurrence/registration, cause of death, whether medically certified or not and kind of medical attention received at the time of death; And characteristics of the mother, pregnancy period etc. in the case of still births.

These forms have two parts: legal and statistical. The statistical part of the vital events registered in the registration units are entered in CS Pro software/, and after the data entry done in the districts, data processing assistant upload all the files of the data entries in Chhattisgarh CRVS MIS Website for the preparation of the Annual Vital Statistical report, the vital statistic section of DES downloads the data sets from the website and generates all tables.

The vital statistics division of the DES prepares this report as per the methodology and instructions issued by the Registrar General of India (RGI) from time to time. The report contains district wise statistics of births, deaths, infant deaths, still births and the related vital rates.

Limitations of the data -

As far as the level of the registration is concerned Chhattisgarh has got **102.43 %** record in the registration of births (which include delayed registration) and **82.12 %** in the case of deaths. As per the year on year data or net registration rate Chhattisgarh was able to register **69.63%** of the births that was estimated to take place in 2017. Hence a lot of vital events are still unregistered. This may be due to lack of awareness about the need and importance of registration of births and deaths and lack of registration procedure knowledge among the public. This may affect the quality of the statistical data. Efforts are being taken to create mass awareness about the importance and necessity of registration.

Status of Reporting -

The local bodies, the Panchayats, municipalities and municipal corporations, district hospitals, community health centers, primary health centers, sub health centers and the central state public sector unit hospitals function as the registration units of vital events in the state.

2 - Analysis of vital Events- Live Births

The criteria followed for including the vital events are “place of occurrence of events” and “year of registration”. By using the above methodology vital events are registered in the registration units and the number of live births by sex is presented in table 2.3. Out of total live births registered, 49.45% is males and 48.87% are females, and for events which are 1.67% of total live births, sex is not reported.

2.1: Live birth by sex:-

2.4.1 : Month wise distribution of live birth registration:-

Live birth by medical attention at birth:-

The table below represents the distribution of live birth by type of medical attention received at the time of delivery. A major portion of live births have occurred in an institutional frame work. In spite of having numerous hospitals both in government as well as private sectors with specialized services across the state, due to different Government maternal schemes there has been an increase in institutional birth this year which has led to reduction in traditional birth delivery method. in rural area 33.84% of live births are attended by the traditional birth attendant/relatives and in urban 4.18% of live births are registered under traditional birth delivery method.

2.5: Live birth by medical attention at birth:-

2.7.1 Percentage distribution of live birth registration (Rural):-

Live birth by method of delivery:-

The table below gives the distribution of registered live births occurred in institutions by method of delivery. Among the number of live births in Government Hospitals, 47.7% are normal deliveries & 2.8% are caesareans. Similarly, among the Live births in Private Hospitals, 41.3% are normal and 5.8% is caesarean, which has depicted that, in year 2017, there has been an increase of normal deliveries in private hospitals as compared to last year.

2.8: Distribution of registered live births by institutions and method of delivery:-

Type of delivery	Normal	Caesarean	Forceps/Vaccum	Not stated	Total

6.5.1: Percentage distribution of registered infant deaths

Conclusion:

It is worthwhile to mention that CRVS is the only authentic source, which can provide vital rates for sub district level. The primary data on vital events are collected at the place where the event happened- hospitals, gram panchayat and urban local bodies. As compare to year 2016 infant death is registered 15.56 % less in this year.
